The screenshot shows a WeChat group chat titled '教育技术研究方法1.0'. The main topic is '7.2 通过课前关于对比实验研究案例的学习, 你想在课堂上继续探讨的问题有哪些?' (7.2 Through learning about comparative experimental research cases before class, what issues do you want to continue discussing in class?). Several questions are listed, such as '1. 怎样保证成绩指标的客观性的原因?' (How to ensure the objectivity of the performance index?) and '2. 在教育研究中需要选取一些人来进行实验, 你会选择什么人, 又该如何选择这些人?' (In educational research, you need to select some people for experiments, who would you choose, and how to choose them?).
